Strong-Tie

Count on MSI to locate the foremost products to increase your production and to get the job done.

MECHANICAL ANCHORING SYSTEMS

Mechanical Anchors are designed to be installed easily and securely into a variety of base material. The diverse selection of anchors can be installed into concrete, grouted and hollow CMU, and brick.

Mechanical Anchors Designed and Tested for Cracked Concrete

STRONG-BOLT® 2: This next-generation wedge anchor achieved a category 1 anchor for performance in cracked concrete under seismic loading. Ideal for hanging pipes, struts, equipment anchorage, and other overhead fixtures. Available in 316 Stainless steel meeting anti-corrosive standards for construction in coastal areas, waste-water and sewage treatment facilities, food processing facilities, pulp and paper mills, and over high-exposure environments.

TORQ-CUT™: Heavy-duty, high-capacity self-undercutting screw anchor provides superior load carrying capacity.

TITEN HD®: High-strength screw anchor for indoor concrete and masonry structural applications.

TITEN HD® Threaded Rod Hanger: Specially designed screw anchor to suspend threaded rod from concrete slabs and beams.

Medium to Light Duty Mechanical Anchors

Crimp: Multi-purpose expansion anchor that is quickly installed with a drilled hole and hammer. Available in duplex, mushroom, rod coupler, or tie-wire head.

Easy-Set: Expansion anchor that can be hammered tight or screwed.

Heli-Tie™: Quickly repair masonry facades with this unique helical wall tie.

HWA: The Hollow Wall Anchor is designed to expand within a wall cavity without expanding the base material.

Heavy Duty Mechanical Anchors

TITEN HD® Mini: Providing the same features of the TITEN HD®, the Mini provides excellent fastening for smaller applications.

TITEN HD® Rod Coupler: Quickly attach single or multi-story rod tie-down systems with this screw anchor.

Wedge-All®: Wedge-style expansion anchor designed for use in solid concrete or grout-filled concrete. Available in a tie-wire version for wire supported fixtures.

Drop-In: Internally threaded expansion anchors for flush mount applications. Available in short, lipped, or coil thread for threaded rod.

Sleeve-All®: Pre-assembled expanding sleeve anchors for use in all types of base material. Available in acorn, hex, flat, rod coupler, or round head styles.

Blue Banger Hanger®: Designed to be set onto wood forms or metal deck prior to concrete pouring. These unique threaded inserts are able to accept threaded rod of multiple diameters.

SMSA/DMSA: Die cast machine screw anchors.

Nailon™: Economical light-duty pin anchors available in nylon or zinc.

LSES: Lag screw expansion shield designed for anchoring lag screws into a variety of base materials.

TITEN®: Hardened screw for attaching components to concrete and masonry. Available in corrosion resistant stainless steel.

ADHESIVE ANCHORING SYSTEMS

EPOXY

Epoxy-based anchoring adhesives provide strength and versatility for a wide variety of applications. These products are ideal for threaded rod, rebar, and smooth dowels.

SET: General use construction grade epoxy.

SET-XP®: High-strength anchoring adhesive for cracked and uncracked concrete.

ET-HP™: High-strength non-shrink anchor grouting material.

EDOT™: Economical high-strength anchoring solution for transportation projects. Available in cartridges or 1-10 gallon kits.

VGC: Vinylester Glass Capsule allows quick application of product.

ACCESSORIES

E-Z-Click™ Injection System: Contains ports and nozzle that minimize waste.

ETR Epoxy Paste-Over: Paste over cracks and injection ports for pressurized sealing.

CIP Paste-Over: A fast-curing past for epoxy or urethane that sets up hard.

CIP-F Paste-Over: A fast-curing peel-able paste that can be removed after epoxy or urethane foam injection repair.

ACRYLIC

Do not let weather conditions determine the completion date of your project. Simpson Strong-Tie® acrylic adhesives are suitable in damp, wet, or water-filled holes. They also continue to cure in under below freezing temperatures.

AT: 10:1 formula designed for all types of weather. Can cure down to 0°F.

AT-XP™: Fast-curing high-strength adhesive for cracked and uncracked concrete. Can cure at temperatures as low as 14°F.

CRACK REPAIR

Restore the cracked and crumbling with a variety of Simpson Strong-Tie® crack-repair adhesive systems.

ETI: Designed for injection of cracks in concrete for a repair that is waterproof and structural. Available in three viscosities.

Crack-Pac®: Low viscosity and surface tension to penetrate fine to medium cracks.

Crack-Pac Flex-H20™: A high solid hydrophobic polyurethane injection resin that is designed to seal leaking cracks in concrete and masonry. Upon contact with water, the resin expands and becomes a flexible seal.

GAS & POWDER ACTUATED

GAS TOOLS

GCN150 Gas-Actuated Concrete Nailer:

Quickly fasten drywall track, furring strips, hat track, and angle track to concrete, steel, CMU, and metal deck. The GCN150 requires no cords or hose because it utilizes a gas fuel supply that allowing complete portability.

GCN-MEP Gas-Actuated Concrete Nailer:

The GCN-MEP provides the user the ability to quickly fasten a variety of per-assembled MEP fasteners. An optional magazine kit allows the MEP to fire GDP Strip Pins.

POWDER TOOLS

Select from over 10 different powder actuated tools to fit any type of high-speed fastening need. Once you have your tool you can choose from dozens of powder actuated fasteners, from rod hangers to threaded studs.
